

London Dec 3rd - 6th 2013

PowerMEMS 2013 Panel Discussion – “Will energy harvesting ever be useful in real applications?”

Wednesday 4th December, 1 pm, venue TBC

This panel discussion will focus on real world applications of energy harvesting and will address the questions:

- What does it take to make energy harvesting a practical and realistic power supply?
- What applications of energy harvesting are currently commercially successful?
- What are the implications of using energy harvesters for end user applications?
- What are the main research challenges for the energy harvesting community?
- Where will the technology be in 10 years' time?

Initially, panel members will each discuss these points based upon their experience. The discussion will then be opened up to the floor with questions and comments encouraged from the audience. A light lunch will be provided to attendees but attendance is limited in number and will be allocated on a first come first served basis.

Confirmed Panel Members so far:

Roy Freeland – Perpetuum

Haydn Thompson – THHINK Wireless Technologies Ltd haydn.thompson@thhink.com

Shad Roundy – University of Utah

Peter Harrop - IDTechEx
